***Subject: Technical problem in provided public data by the Bulgarian TSO***

Dear Ms. Kadieva,

I would like to thank you for your letter of 9 May 2018, in which you alert the Agency for the Cooperation of Energy Regulators (“the Agency”) on the importance for all market participants of a reliable and transparent access to wholesale energy market information. I would also like to reassure you that the Agency takes the data quality issue under great consideration.

On 31 May 2018, the Agency issued a communication to raise Transmission System Operators’ and National Regulatory Authorities’ awareness about the importance to ensure that adequate processes to safeguard the quality of the information published on the Transparency Platforms are implemented.

This issue was also brought to the attention of all the Florence Forum’s participants on 31 May and will be further discussed with the National Regulatory Authorities, and more specifically with the Bulgarian National Regulatory Authority.

For possible future instances of incorrectly published information that may impact the integrity of the market, I would like to point you to the Agency’s Notification Platform (available here: <https://www.acer-remit.eu/np/str>).

Yours sincerely,

  
Alberto Pototschnig
